

Pickle Rick – Tryhackme

Ran a nmap scan first: nmap <ip>

- ➔ Found http and SSH session going on
- ➔ Decided to focus on the http: loaded the ip on my browser

Opened the developer tools and found the username for something:

R1ckRu13s

Curl <http://10.64.188.11/robots.txt> gave me : Wubbalubbadubdub.

A password?

Using gobuster to figure out if there are other paths I could go to:

```
└──(kali㉿kali)-[~]
```

```
└─$ gobuster dir -u http://10.64.188.11 -w /usr/share/wordlists/dirbuster/directory-list-2.3-medium.txt -x php
```

```
=====
```

Gobuster v3.8.2

by OJ Reeves (@TheColonial) & Christian Mehlmauer (@firefart)

```
=====
```

```
[+] Url: http://10.64.188.11
[+] Method: GET
[+] Threads: 10
[+] Wordlist: /usr/share/wordlists/dirbuster/directory-list-2.3-medium.txt
[+] Negative Status codes: 404
[+] User Agent: gobuster/3.8.2
[+] Extensions: php
[+] Timeout: 10s
```

```
=====
```

Starting gobuster in directory enumeration mode

=====

login.php (Status: 200) [Size: 882]
assets (Status: 301) [Size: 313] [--> http://10.64.188.11/assets/]
portal.php (Status: 302) [Size: 0] [--> /login.php]

"I could've used -x txt,php,js,css, would've made the search more thorough
went to <http://10.64.188.11/portal.php> and got a login page.

Put in:

Username: R1ckRul3s

Password: Wubbalubbadubdub

And got a command page, but it disallows the cat command:

total 40

```
drwxr-xr-x 3 root root 4096 Feb 10 2019 .  
drwxr-xr-x 3 root root 4096 Feb 10 2019 ..  
-rwxr-xr-x 1 ubuntu ubuntu 17 Feb 10 2019 Sup3rS3cretPickl3Ingred.txt  
drwxrwxr-x 2 ubuntu ubuntu 4096 Feb 10 2019 assets  
-rwxr-xr-x 1 ubuntu ubuntu 54 Feb 10 2019 clue.txt  
-rwxr-xr-x 1 ubuntu ubuntu 1105 Feb 10 2019 denied.php  
-rwxrwxrwx 1 ubuntu ubuntu 1062 Feb 10 2019 index.html  
-rwxr-xr-x 1 ubuntu ubuntu 1438 Feb 10 2019 login.php  
-rwxr-xr-x 1 ubuntu ubuntu 2044 Feb 10 2019 portal.php  
-rwxr-xr-x 1 ubuntu ubuntu 17 Feb 10 2019 robots.txt
```

So I used the less command: less Sup3rS3cretPickl3Ingred.txt

First Ingredient: mr. meeseek hair

Then I ran: less clue.txt and found:

Look around the file system for the other ingredient.

- ➔ ls la /*
- ➔ got a LOT of folders in return
- ➔ Ran sudo ls /* to see if I missed any root folders:
- ➔ Found /root/3rd.txt

Ran Sudo(because its in the root folder) less /root/3rd.txt(because cat isn't allowed) and got:

3rd ingredients: fleeb juice

Where is the second ingredient though?

There is a 'rick' folder in the home directory: worth looking into it.

- Ran ls /home/rick
- second ingredients
- SO I ran less /home/rick/second ingredients
- Got nothing back. Why?

Realized that since the filename has a space within, I need to put double quotes around it when I run the command:

Less /home/rick/"second ingredients": 1 jerry tear(Got the Second Ingredient!)

Results:

First Ingredient: mr. meeseek hair

Second Ingredient: 1 jerry tear

Third ingredient: fleeb juice

Takeaway: *this isn't about knowing everything. It's more about knowing the steps I can take to solve a problem and adapting to the situation through research. Knowing what actions to take next broadly, is more important than memorizing everything or knowing every syntax.*
